Dear Sir/Madam,

Re: Complaint regarding APEX Global Multi-Asset Autocallable Note Series 7 (Account CL002)

I am writing to formally complain about the sale of the APEX Global Multi-Asset Autocallable Note Series 7 in my account, which currently represents about 15% of my portfolio.

I have held this account with a Conservative risk profile since I retired, and my main goal has always been to preserve my capital and receive stable income to supplement my CPF and pension. At my annual review on 20 January 2026 with my Relationship Manager, I realised for the first time that this note could cause me to lose a significant part of my capital if the market falls far enough, and that the coupon is not guaranteed. I do not recall this being explained clearly to me at the time of purchase, and I do not believe this product matches what I asked for, which was a safe way to earn a bit more interest than a fixed deposit.

I would like the bank to review how this product was sold to me, including whether my risk profile and the product's risk rating were properly matched, and whether I signed anything that clearly explained the risk of losing my capital. I would like this resolved as soon as possible, including being given the option to exit this position without further loss to me if the sale is found to have been unsuitable.

I look forward to your response.

Yours faithfully,
Robert Chua

Complaint Letter — CPL-2026-057

Dear Sir/Madam,

Re: Delay in rebalancing my portfolio following my retirement notice (Account CL013)

I am writing to express my concern about the handling of my portfolio following the notice I gave my Relationship Manager, Daniel Koh, by email on 7 August 2026, informing him that I am retiring in approximately six months and want to de-risk my portfolio before then.

Daniel and I spoke on 11 August 2026, and he explained a phased plan to reduce my growth equity and private equity exposure over the following two quarters. I understood and accepted that a phased approach made sense to avoid selling into a bad price. However, it is now nearly two weeks later and, to the best of my knowledge, no rebalancing trades have been made. I understand my account risk profile has been updated in your system to Conservative, but my actual holdings still look exactly as they did before I raised this — around two-thirds in growth equities and 15% in an illiquid private equity fund.

Given ongoing market volatility, I am concerned that the delay is leaving me more exposed than I should be at this stage, and I would like written confirmation of the rebalancing timeline together with a commitment to specific dates for the first phase of trades.

Regards,
James Sullivan
