

Dual Currency Investment (DCI) — AUD/USD

FX-Linked Structured Deposit Fact Sheet — as at 31 August 2026

Document Code

FS-FX-SG-7X-DCI

Classification

Internal Use Only

SUMMARY RISK INDICATOR

5 / 7 — HIGH RISK

COMPLEX PRODUCT / FX
RISK

IMPORTANT: This is a Specified Investment Product (SIP) / Complex Product, not a fixed deposit. You may receive your principal back in a weaker alternate currency, resulting in a loss when converted back to your base currency. This product is NOT covered by the Singapore Deposit Insurance Corporation (SDIC), even though it is issued by a bank.

Product Description

The DCI is a short-tenor (typically 1 to 3 months) FX-linked structured deposit denominated in a Base Currency (USD) with an Alternate Currency (AUD). In exchange for accepting FX conversion risk, the investor earns an enhanced yield versus a plain USD fixed deposit. At maturity, if the AUD/USD exchange rate is at or above the pre-agreed Strike Rate, principal and enhanced yield are paid in USD. If the exchange rate is below the Strike Rate, principal and yield are converted and paid in AUD at the Strike Rate — the weaker currency — which can result in a loss when the investor subsequently converts back to USD.

Key Facts

Issuer	Meridian Peak Bank (Singapore) Limited
Base Currency	USD
Alternate Currency	AUD
Tenor	1 month (rollable at maturity at prevailing terms)
Strike Rate	Set at inception, typically 1-3% below the prevailing spot rate
Indicative Enhanced Yield	Up to 6.5% p.a. (vs. approx. 4.0% p.a. on a plain USD fixed deposit of the same tenor)
Principal Protection	Protected only in the currency of settlement; NOT protected against FX conversion loss
Early Withdrawal	Not permitted prior to maturity
Deposit Insurance	NOT covered by the Singapore Deposit Insurance Corporation (SDIC)
Minimum Investment	USD 50,000
Regulatory Classification	Specified Investment Product (SIP) / Complex Product under MAS rules
Distributor Restriction	Not offered to Retail Investors without passed CAR/CKA and signed risk acknowledgement

Who Is This Product Designed For?

- Sophisticated investors with a Growth or Aggressive Growth risk profile who hold a tactical view on AUD/USD.
- Investors who can accept receiving their principal back in AUD (the weaker currency scenario) without financial hardship.

- Investors who do not need guaranteed access to these funds before maturity.

Key Risks

- FX conversion risk: the investor may receive principal and yield in AUD at a rate worse than the market rate at maturity, crystallising a loss versus the original USD amount.
- No early redemption: funds are locked until maturity regardless of the investor's liquidity needs.
- Not deposit insured: despite being issued by a bank, the product is not covered by SDIC.
- Issuer credit risk: repayment depends on the issuing bank's solvency.
- Complexity and rollover risk: investors who roll the DCI repeatedly may not fully appreciate cumulative FX exposure over time.
