

Meridian Peak Regular Premium Investment-Linked Policy

Insurance-Linked Investment (ILP) Product Summary — as at 31 August 2026

Document Code FS-ILP-SG-014 Classification Internal Use Only

SUMMARY RISK INDICATOR 4 / 7 — MEDIUM-HIGH RISK Insurance + Investment Combination Product

IMPORTANT: This is an insurance product with an investment component. Part of your premium pays for insurance and other charges. If you cancel early, the surrender value may be substantially less than the premiums you have paid, especially in the first few policy years. This product is not the same as, and should not be compared solely on returns with, a standalone unit trust or fund.

Product Description

The Policy combines life insurance coverage with an investment account. Regular premiums are allocated between insurance and other charges (mortality charge, policy fee, and initial allocation charge) and units purchased in the policyholder's chosen underlying sub-fund(s), selected from the Fund Manager's approved sub-fund menu (equity, bond, or balanced-style sub-funds). The investment value is not guaranteed and depends on the performance of the chosen sub-fund(s) after deduction of all charges.

Key Facts

Product Provider	Meridian Peak Life Assurance (Singapore) Pte. Ltd.
Policy Term	20 years, or to age 65, whichever is later (client-selected at inception)
Premium Structure	Regular premium, monthly or annual, reviewable
Minimum Premium	USD 300/month or USD 3,000/year
Death Benefit	Higher of sum assured or investment account value, less indebtedness
Initial Allocation Charge	Up to 60% of premium in policy years 1-2, reducing to 0% by year 6
Mortality & Policy Charges	Deducted monthly by cancellation of units; increase with policyholder age
Surrender Charge	Up to 90% of account value if surrendered in year 1, reducing to 0% after year 10
Free-Look Period	14 days from policy delivery
Sub-Fund Choices	Equity, Bond, and Balanced-style sub-funds managed by Meridian Peak Asset Management
Guaranteed Maturity / Cash Value	None — investment value is not guaranteed at any time

Illustrative Default Sub-Fund Allocation

Asset Type	% of Fund
Balanced-style sub-fund	60%
Bond-style sub-fund	30%
Equity-style sub-fund	10%

Who Is This Product Designed For?

- Investors who want life insurance protection combined with investment exposure in a single product.
- Investors who intend to hold the Policy for its full term (10+ years) and understand early surrender is costly.
- Not designed for investors seeking pure investment returns or short-term liquidity — a standalone fund or MMF is likely more cost-efficient for that objective.

Key Risks

- High early surrender charges: cancelling in the first few years can result in receiving significantly less than premiums paid, potentially close to zero in year 1.
- Charges reduce investment returns: mortality and policy charges increase with age and reduce the amount actually invested.
- Non-guaranteed values: both the death benefit investment component and any illustrated cash values are not guaranteed.
- Underlying sub-fund investment risk: market, credit, and currency risks of the chosen sub-fund(s) apply in full.
- Complexity risk: total cost of ownership is harder to compare directly to a standalone fund due to the combination of insurance and investment charges.
