

Know-Your-Customer & Client Onboarding Policy

Meridian Peak Wealth Partners (Singapore) Pte. Ltd. — Private Wealth Management Division

Document Code POL-KYC-004 (Rev. 6) Classification Internal Use Only

1. Purpose

This Policy sets out the minimum standards for identifying and verifying the identity of clients, assessing source of wealth and source of funds, and performing ongoing due diligence, in line with the Monetary Authority of Singapore (MAS) Notice SFA 04-N02 (Prevention of Money Laundering and Countering the Financing of Terrorism — Capital Markets Intermediaries) and internal Group standards.

2. Scope

Applies to all Relationship Managers (RMs), onboarding officers, and compliance staff involved in accepting new individual, joint, corporate, or trust clients across the firm's Singapore, Hong Kong, and regional booking centres.

3. Client Risk Rating

Every client must be assigned a Client Risk Rating (CRR) of Low, Medium, or High at onboarding and reviewed at the frequency below. The CRR determines the due diligence tier applied.

Client Risk Rating	Review Frequency	Due Diligence Tier
Low	Every 5 years	Standard CDD
Medium	Every 3 years	Standard CDD + enhanced source-of-wealth check
High (incl. PEPs, UHNW, complex structures, cross-border booking)	Annually	Enhanced Due Diligence (EDD) + senior management sign-off

4. Mandatory Identification Documents

- Individual clients: government-issued photo ID (passport / NRIC), proof of residential address dated within 3 months.
- Corporate / trust clients: constitutional documents, register of directors and shareholders, beneficial ownership declaration down to natural persons holding 25% or more.
- All clients: declaration of source of wealth and source of funds, with supporting documentary evidence for High CRR clients (e.g. sale agreements, audited financial statements, dividend vouchers).

5. Politically Exposed Persons (PEPs)

Clients, and their immediate family members and close associates, must be screened against PEP and sanctions lists at onboarding and on an ongoing basis (minimum: daily automated screening against list updates). A PEP match automatically assigns High CRR and requires Senior Management approval prior to account activation.

6. Cross-Border Booking Centre Clients

Where a client is resident in one jurisdiction (e.g. Indonesia, India, Hong Kong) and assets are booked in another (e.g. Singapore), the onboarding team must additionally confirm: (i) the cross-border marketing and

solicitation rules of the client's home regulator have been observed (e.g. Indonesia's OJK, India's RBI/SEBI regulations on outward remittance and offshore investment); (ii) tax residency self-certification has been obtained for Common Reporting Standard (CRS) purposes; and (iii) source of funds for the cross-border transfer has been independently verified.

7. Ongoing Monitoring

- Transaction monitoring alerts must be cleared or escalated within 5 business days.
- Client information (occupation, net worth, source of wealth) must be refreshed at the review frequency in Section 3, or immediately upon a material trigger event (e.g. large unexplained inflow, adverse media, change in employment).
- Dormant accounts (no client-initiated activity for 12 months) are subject to reactivation KYC refresh before further transactions are processed.

8. Roles & Responsibilities

- Relationship Manager: collects documentation, performs first-level assessment, escalates red flags.
- Compliance (Onboarding Team): independently reviews and approves/rejects new accounts; maintains PEP/sanctions screening.
- Senior Management: approves onboarding of all High CRR clients and any PEP relationships.
