

Relationship Manager Call & Meeting Notes Log

Meridian Peak Wealth Partners (Singapore) Pte. Ltd. — Private Wealth Management Division

Document Code	LOG-RMNOTES-2026-Q3	Classification	Internal Use Only
---------------	---------------------	----------------	-------------------

This log consolidates Relationship Manager (RM) call and meeting notes for the client population in this dataset, extracted for the period January 2026 to August 2026. Entries are recorded by the servicing RM within 2 business days of client contact, per internal service standards.

CL001 — Tan Wei Ling	Date: 2026-07-02	Channel: Video Call	RM: Daniel Koh
----------------------	------------------	---------------------	----------------

Summary: Routine quarterly portfolio review. Client remains comfortable with current allocation, including the structured note and PE co-investment position. Reaffirmed her Aggressive Growth objective and high tolerance for illiquidity given her age and income profile.

Action Items: None — no changes requested. Next scheduled review: 2026-10-02.

CL002 — Robert Chua	Date: 2026-01-20	Channel: In-Branch Meeting	RM: Grace Lim
---------------------	------------------	----------------------------	---------------

FLAG: Client comprehension concern raised — potential suitability issue on a Conservative-profile account.

Summary: Annual portfolio review at Toa Payoh branch. When reviewing the APEX Autocallable Note position (15% of AUM), client stated he “did not fully understand” how the note worked and thought it was “like a fixed deposit with a bit more interest.” Client appeared confused about the Knock-In Barrier and capital-at-risk feature when explained.

Action Items: RM to escalate to Compliance for suitability review; check for signed risk acknowledgement on file; consider re-explaining product mechanics or proposing an unwind/redemption path at next available exit window.

CL004 — Michael Wong	Date: 2026-06-30	Channel: In-Person Meeting	RM: Cheryl Ng
----------------------	------------------	----------------------------	---------------

Summary: Annual family office review held at client's office. Discussed diversification progress away from the family manufacturing business and reconfirmed the family office's Investment Policy Statement permitting up to 20% in complex/alternative instruments (currently at 15% via the autocallable note, plus 20% in the PE vehicle, which is tracked separately under the alternatives allocation).

Action Items: RM to provide updated family office consolidated statement by 2026-07-15. No portfolio changes requested.

CL006 — Ahmad Faisal bin Rahman	Date: 2026-02-14	Channel: Phone Call	RM: Cheryl Ng
---------------------------------	------------------	---------------------	---------------

Summary: Follow-up call to complete CRS tax residency self-certification for the Singapore booking centre account, required following his relocation of primary residence confirmation to Kuala Lumpur. Client confirmed no US tax residency.

Action Items: CRS form countersigned and filed 2026-02-14. No further action.

CL008 — Carlos Bautista	Date: 2026-03-15	Channel: Phone Call	RM: Grace Lim
-------------------------	------------------	---------------------	---------------

FLAG: CAR/CKA gap identified on file review — DCI sold to a Retail Investor without the required assessment.

Summary: Relationship call. RM introduced the Dual Currency Investment (DCI, AUD/USD) as a “yield enhancement idea” given client's interest in tactical FX views. Client expressed interest and verbally agreed to proceed. Trade booked same day.

Action Items: None recorded at the time. (Note: subsequent file review identified that no Customer Account Review / Customer Knowledge Assessment was completed prior to this trade — see suitability flag on client record.)

CL009 — Le Thi Mai

Date: 2026-07-19

Channel: Video Call

RM: Cheryl Ng

Summary: Onboarding follow-up after a large inbound transfer (proceeds from partial sale of her logistics platform). Source of funds re-verified with supporting sale agreement. Client requested exposure to the APEX Autocallable Note and PE Fund IV given her risk appetite; signed product-specific risk acknowledgement obtained during the call and countersigned same day.

Action Items: Signed risk acknowledgement filed 2026-07-19. Trades booked following settlement of funds.

CL011 — Park Ji-hoon

Date: 2026-06-10

Channel: Phone Call

RM: Cheryl Ng

FLAG: Concentration guideline query pending Compliance response — no exception documented as of log date.

Summary: Quarterly review. Noted that the autocallable note position has grown to approximately 35% of AUM following mark-to-market gains and a recent top-up, which the RM flagged internally as exceeding the 20% complex-product concentration guideline. Client (an Accredited Investor) stated he is “fine with concentration” and does not wish to trim the position.

Action Items: RM raised the concentration observation with Compliance via internal query on 2026-06-11; awaiting written guidance on whether the 20% guideline applies to Accredited Investors and, if so, whether a documented senior-management exception is required.

CL013 — James Sullivan

Date: 2026-08-11

Channel: Phone Call

RM: Daniel Koh

FLAG: Rebalancing plan not yet executed as of log date — portfolio remains misaligned with revised risk profile.

Summary: Follow-up call after client's 2026-08-07 email advising his upcoming retirement and wish to “de-risk before I finish up.” Discussed timeline: client confirmed retirement effective in approximately 6 months and reiterated preference for capital preservation. RM explained current portfolio is still growth-tilted (65% equities, 15% illiquid PE) and proposed a phased rebalancing plan over the next 2 quarters to avoid crystallising losses in a single transaction.

Action Items: RM to prepare a phased rebalancing proposal for client sign-off by 2026-08-25. Portfolio review record to be updated to reflect the revised Conservative risk profile (already updated in CRM on 2026-08-10) pending execution of the rebalancing plan.

CL014 — Zhang Wei

Date: 2026-06-30

Channel: In-Person Meeting

RM: Cheryl Ng

Summary: Annual PEP-adjacent monitoring review (client's 2016-2020 municipal advisory committee role). Refreshed adverse media screening — no new findings. Discussed succession planning intentions for the family holding company; client considering a trust structure, to be discussed further with Legal & Trust Advisory in a separate engagement.

Action Items: Annual PEP-adjacent review closed out; next due 2027-06-30. Referral made to Trust Advisory team per client's request.

Summary: Discussed headroom under India's Liberalised Remittance Scheme (LRS) USD 250,000 annual limit ahead of a planned further remittance for investment top-up. Client confirmed approximately USD 40,000 of headroom remaining for the current financial year based on remittances made earlier in 2026. RM advised client to confirm exact figure with his India-based tax advisor before initiating transfer.

Action Items: RM to reconfirm LRS headroom documentation before accepting any further inbound transfer this financial year.
